- TSDS / Ed-Fi
- Data Validation
- Compliance Reporting
- Process Documentation
- Communication
- Python
- Excel Tools & Data Analysis
- Website Management
- Data Presentation
- Remote Support
- Professionalism
- Teamwork

PROFESSIONAL EXPERIENCE

Public Education Information Management System - P.E.I.M.S Supervisor

Edinburg Consolidated Independent School District
Oct. 2024 - Present | Edinburg, TX

- Lead districtwide PEIMS data collection, validation, and submission processes for 43 campuses and approximately 34,000 students.
- Supervise, train, and support PEIMS Specialists and campus staff on TEA reporting requirements, data corrections, timelines, and compliance procedures.
- Coordinate validation of student, attendance, discipline, enrollment, graduation, special programs, and accountability-related data to improve reporting accuracy and audit readiness.
- Develop SQL-based audits, exception reports, and monitoring workflows to identify PEIMS discrepancies, fatal errors, special warnings, and high-risk reporting issues.
- Collaborate with campus administrators, registrars, counselors, Special Education, Technology, and district leadership to resolve reporting issues and maintain data integrity.

Systems and Web Programmer

Edinburg Consolidated Independent School District
Sept. 2023 - Oct. 2024 | Edinburg, TX

- Developed SQL queries, reports, and data tools to support district reporting, student information systems, and decision-making.
- Supported Skyward SMS workflows, custom reports, and internal systems used by PEIMS, attendance, student services, and campus staff.
- Automated and optimized data processes to improve reporting accuracy, reduce manual review, and increase access to timely information.

IT Support Specialist

SLG Technologies | Oct 2022 - Sept. 2023 | Glen Rose, TX

- Provided technical support for county, school, and public-sector users by resolving hardware, software, access, and network-related issues.
- Supported technology operations for two Texas counties, helping maintain system availability and minimize downtime for critical services.
- Assisted with system upgrades, hardware deployments, network improvements, and infrastructure projects across multiple client environments.
